

Group 7 Steering

GENERAL: This group contains information on the steering components from the coach steering wheel to the front wheel steering arms. It includes all components necessary to provide power steering if coach is so equipped.

SPECIFICS: As applicable

...Power Steering Hydraulic Lines, fittings and Reservoir

...Power Steering Pump (on engine)

...Power Steering Pump Drive Components

...Steering Gear

...Steering Gear Column and Mounting Parts

...Steering Linkage From Pitman Arm to Front Wheels

...Steering Wheel and Mounting Parts (including horn button, turn lever, tilt lever, etc.).

NOTE:

The diagram below will serve as an exploded view of the assembly to be serviced. Use the diagram as a guide and not an absolute as dimensions are not to scale. The new kit, as designed by FMC provides 2 plastic bushings per side that ride on polished and ground shafts. They are lubricated via grease used during installation of the components as well as injection thru a grease fitting you should install in the body weldment of both the bellcrank and idler assembly. During installation be sure components are torqued for proper crush so that the bushing properly rides on this new shaft.

FMC Corp. cycle life testing showed this modification to out-perform the stock design by over a 5 to 1 ratio. It was developed for use originally in the FMC transit installations.
